

Nikolay Smilenov

Junior Full-Stack / Web Developer | AI & Cybersecurity

Sofia, Bulgaria • smilenov@icloud.com • Driving licence: Category B

PROFILE

Developer focused on building modern web applications and digital products. I learn by building real projects and continuously expand my knowledge in web development, AI and cybersecurity. I use AI-assisted development to accelerate research, implementation and debugging while reviewing and testing the resulting code.

TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Backend / Data	Node.js, Supabase, PostgreSQL
Tools / Deployment	Git, GitHub, Vercel, Cloudflare
Cybersecurity	Linux, Networking, Cybersecurity Fundamentals, Reconnaissance
AI	AI-assisted development, AI applications, automation, AI agents (currently learning)

SELECTED PROJECTS

PromoGuru.bg

Promotion and deals discovery platform.

- Built a modern web platform for discovering promotions and discount information.
- Worked on automated data processing, validation workflows, responsive UI and SEO-oriented pages.
- GitHub: github.com/promogurubg-netizen/promo-guru-bg • Live: promoguru.bg

Satovcha.info

Local news and community information platform.

- Built a modern responsive portal bringing local news, events, tourism, businesses, listings, jobs and village information together.
- Designed the content structure, navigation and user experience for desktop and mobile.
- GitHub: github.com/satovchainfo-debug/satovcha-info • Live: satovcha.info

Stinger — Private Project

Automated market analysis, monitoring and decision-support platform.

- Built a private system integrating MetaTrader 5 with automated market scanning and decision workflows.
- Implemented monitoring for decisions, risk, positions, system health and AI-assisted analysis.
- Private repository; interface and case study available on portfolio.

EDUCATION & PROFESSIONAL DEVELOPMENT
